\* Document for sale by Superintendent of Documents.

† Distribution by office issuing document, free if unaccompanied by a price.

‡ Document not obtainable.

## Explanation

Words and figures inclosed in brackets [] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 63d Congress, 2d session, is to be understood.

## SALES OF GOVERNMENT PUBLICATIONS

The Superintendent of Documents, Washington, D. C., is authorized to sell at cost of paper and printing any United States public document in his charge, the distribution of which is not otherwise provided for.

Publications can not be supplied free to individuals nor forwarded in advance of payment.

Publications entered in this catalogue that are for sale by the Superintendent of Documents are indicated by a star (\*) preceding the price. A dagger (†) indicates that application should be made to the Department, Bureau, or Division issuing the document. A double dagger (‡) indicates that the document is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary it will be found under the name of the Bureau by which it was published. The Senate and House documents and reports are issued in limited editions and, unless otherwise indicated, may be obtained only through Members of Congress.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing Department, Bureau, or Division, and the title of the publication. If the publication is numbered, give the number also. Every such particular assists in quick identification. Do not order by the Library of Congress card number.

The accumulation of publications in this Office amounts to several millions, of which over a million are assorted, forming the sales stock. Many rare books are included, but under the law all must be sold "at cost," regardless of their age or scarcity. Many of the books have been in stock some time and are apt to be shop-worn. In filling orders the best copy available is sent. A general price-list of public documents is not available, but lists on special subjects will be furnished on application.

### MONTHLY CATALOGUE DISTRIBUTION

The Monthly catalogue is sent to each Senator, Representative, Delegate, Resident Commissioner, and officer in Congress, to designated depositories and State and Territorial libraries, to substantially all Government authors, and to as many school, college, and public libraries as the limited edition will supply.

Subscription price to individuals, \$1.10 a year, including index. Back numbers can not be supplied. Notify the Superintendent of Documents of any change of address.

### LIBRARY OF CONGRESS CARDS

Numbers to be used in ordering the L. C. catalogue cards will be found at the end of the titles of the more important monographic documents. The figure following the card number (separated from it by a slanting line) indicates the number of cards required for entries suggested (title entry not included) on the cards. The price of the cards is 2c. for the first card and  $\frac{1}{3}$ c.

for each additional card for the same title ordered at the same time. Remittances for the L. C. catalogue cards should be made to the Librarian of Congress. They can not be furnished by the Superintendent of Documents.

#### INDEX

An Index to the Monthly catalogue is issued at the end of the fiscal year. This contains index entries for all the numbers issued from July to June, and can be bound with the numbers as an index to the volume. Persons desiring to bind the catalogue at the end of the year should be careful to retain the numbers received monthly, as duplicate numbers can not be supplied.

#### HOW TO REMIT

Remittances for the documents marked with a star (\*) should be made to the Superintendent of Documents, Washington, D. C., by postal money order, express order, or New York draft. Currency, if sent, will be at sender's risk.

Postage stamps, foreign money, and defaced or smooth coins are not acceptable.

No charge is made for postage on documents forwarded to points in the United States, Alaska, Guam, Hawaii, Philippine Islands, Porto Rico, Samoa, or to Canada, Cuba, Mexico, or Shanghai. To other countries the regular rate of postage is charged, and remittances must cover such postage.

The issue of coupons redeemable in public documents by the Superintendent of Documents has been discontinued.

## NOTES OF GENERAL INTEREST

There is a new print of Field service regulations, United States Army, corrected to July 1, 1914, and sold at 60 cents, in fabrikoid binding.

Reprint 222 from Public health reports is Cooperative public health administration, an experiment in small communities. It describes a successful experiment in uniting a group of six town communities in supporting a cooperative health office corresponding in efficiency to those in large cities. It is hoped that this successful experiment may lead to many others, by which the standard of sanitation may be raised in country places to that now attained in most of the larger cities. According to oldtime beliefs, the country should be more healthful than the cities. No doubt this was once the case, but by the establishment of health offices in the cities and the lack of such offices in the country the scale has been turned, and the cities appear now to be more healthful than the country. By such cooperation as this reprint describes, the scale may perhaps be turned again.

A correspondent in New York City, writing on Nov. 22, 1914, said this among other interesting things: "I do not want something for nothing, but simply a list of the books the Government publishes and the prices thereof. I, as well as my friends, have difficulty in finding out just what the Government does publish. Some send to Senators and Congressmen, but they have only so many to distribute, a long correspondence ensues, and that is generally the end of it. If one could only find out just what the Government published, and the price, he could attend to it himself." The gentleman's ideas are eminently sound, and the Documents Office was glad to be able to supply the information to enable him to carry them out.

By virtue of a Senate resolution adopted Feb. 28, 1913, a new edition of Gilfry's Precedents, decisions on points of order, with phraseology, in the United States Senate, has been printed, bringing the record up to the close of the 62d Congress, Mar. 4, 1913.

The Comptroller of the Currency has issued an important circular (Form 2207) entitled Duties and liabilities of directors of national banks and member banks of the Federal reserve system.

Civil service examinations are soon to be held in several hundred places to create eligible lists for bookkeepers, clerks, and messengers for the Federal Reserve Board.

The Report of the proceedings of the annual convention of National Association of Railway Commissioners, which was for many years printed by the Interstate Commerce Commission and thus made a public document of the United States and consequently sold by the Superintendent of Documents, was last year printed by the American Law Reporting Company of 115 Broadway, New York, and thus deprived of its status as a document. The same will be the case this year. The publisher will also be the seller. The price will be \$1.00.

The Public Health Service is issuing a new numbered series of publications, called "Health news," not printed in the strict use of the term, but reproduced

by one of the many multiplying processes of the day which are so much like printing that it is difficult to draw a hard-and-fast line between them. The primary object of the new series is to try to induce the newspapers to take a little more interest in health matters by supplying to them ready-made "copy" of guaranteed authenticity. Twenty-two numbers have been sent out, the date of no. 1 being Sept. 19 and of no. 22, Dec. 4. It will be seen by the following list of titles that the material is practical and timely: The existing need for competent health officers and how they may be obtained; Punch holes in the bottom of tin cans and prevent malaria; Hygiene of rural schools; Cause and prevention of pellagra; Drug intoxication; Prevention of pellagra; Friedmann tuberculosis cure; Possibility of eliminating the drug-store saloon; Prevention of scarlet fever; Eradication of yellow fever and malarial fever in Iquitos, Peru; Sale and use of poisons; Sale and use of cocaine and narcotics; Pure water to be furnished on trains and boats; Prevention of disease among workmen; Poisons and habit-forming drugs; Extermination of ground squirrels in California; An example of sanitary vigilance; Treatment of a vessel infected with plague today, as compared with the treatment of infected vessels in the sixteenth century; Entertainment of persons detained at U. S. quarantine stations; Value of mental hygiene in the development of backward children; A progressive township; Sanitation of rural schools.

#### FEDERAL RESERVE ACT INDEXED

The Federal Reserve Board is having made an official index to the Federal reserve act. It will be very complete and minute, filling more than 400 pages. It will be bound in cloth and sold by the Superintendent of Documents at 75 cents.

The Board is also issuing a series of numbered Regulations and some other publications, but these are furnished free on application to the Board direct.

#### A LONG ESTABLISHED GOVERNMENT SERIES SUPERSEDED

Beginning with the 2d convention in 1885, the Proceedings of the annual conventions of the Association of Official Agricultural Chemists have been continuously published as bulletins of the Chemistry Bureau, Agriculture Department, up to and including the 29th convention, held in Washington, Sept. 16-18, 1912. Then the Agriculture Department decided to discontinue printing them. The numbers of the Chemistry Bureau bulletins in which the Proceedings are printed are: 7, 12, 16, 19, 24, 28, 31, 35, 38, 43, 47, 49, 51, 56, 57, 62, 67, 73, 81, 90, 99, 105, 116, 122, 132, 137, 152, 162.

Thus left to its own resources, the Association has resolved to establish a quarterly journal or magazine in which it may, if it chooses, print the proceedings of its own annual conventions. It is understood to have been decided that the hitherto unprinted proceedings of the convention of 1913 shall see the light in the new magazine, but when and where the new magazine shall see the light has not yet been decided.

Interested persons may make inquiry of Dr. Carl Alsberg, Chief of the Chemistry Bureau, Agriculture Department, who is secretary and treasurer of the Association of American Official Agricultural Chemists.

The 1914 convention of the Association was held in Washington during the present month and was the most successful of its meetings, 300 members having been present. Dr. Harvey Washington Wiley, who was for many years secretary of the Association, is now its honorary president.

### "CAPITULATIONS" OF THE TURKISH EMPIRE

The item in the foreign news a short time ago to the effect that the Turkish Government had abrogated all its "capitulations" without asking the consent of other Powers was rather a puzzle to all who did not know that "capitulation" is the technical designation for the peculiar form of treaty that other nations have been from time immemorial making with Turkey.

Before concluding that the puzzle has no answer, ask public documents. They can not answer all questions, but they can answer this one. Apr. 7, 1881, President Garfield sent to Congress Part 1 of a Report on the capitulations of the Ottoman Empire, which had been made by Edward A. Van Dyck, American consular clerk. This Report was printed as Senate ex. doc. 3 of the 47th Congress, special session, Mar. 4-May 20, 1881. It gives a historical sketch of the whole series of capitulations and the text of many.

Feb. 2, 1882, President Arthur sent to Congress Part 2 of Van Dyck's report, and it was printed as Senate ex. doc. 87 of the 47th Congress, 1st session. The report thus completed is considered a valuable treatise on a little-known subject.

Parts 1 and 2 are bound up with other reports in two large leather-bound volumes known in the Documents Office as *Serials* 1943 and 1989. The price of the first named is \$1.75, and of the second \$1.90.

### A RECORD OF LITERARY AND HISTORIC INTEREST

The Copyright Office, Library of Congress, has well under way a work of magnitude and of great dramatic interest.

It is a title list of all dramas copyrighted in the United States from 1870 to the present time. There are about 53,000 of these dramas, of which it is estimated that less than one in fifty has been produced on the stage. It will be seen, therefore, that the new list will resurrect from the tombs of the Capulets many thousands of long-buried compositions, some of which may have deserved a better fate, and some few of which may even yet see the footlights through the benevolent agency of the new list.

It is to be a very comprehensive list, showing the names of the authors, translators, adapters, copyright proprietors, and even the names of the original authors in the case of adaptations.

This new guide to the dramatic literature of America will certainly exceed one volume in bulk and may require three volumes for its proper presentation. Its formal title-page has not yet been drafted and no part of it has yet been put in type, but the work of compilation has long been under way and the compilers have begun to form anticipatory conceptions of the extent and physical semblance of the completed work. It must, however, be many months before these conceptions can be visualized, for such compilations can not safely be "rushed."

### COMPARATIVE METHODS OF TAXATION

Taxation and revenue systems of State and local governments was issued in October by the Census Bureau. The letter of transmittal states that while this has been prepared in connection with the decennial investigation of wealth, debt, and taxation, it is published in advance of the complete report that the information may sooner reach the public. It presents a digest of the laws relating to taxation in the several States. The period covered includes the year 1912, and for those States whose legislatures convened in 1913 the revenue legislation of that year is also included. A vast amount of statistical informa-

tion of permanent value is thus presented in comparatively small compass. 50 cents.

#### PASSING OF THE LARGEST PUBLIC DOCUMENT SERIES

The Specifications and drawings of patents undoubtedly have the distinction of being the largest series yet issued by the Government. Its publication began May, 1871, in weekly volumes; August, 1872, the form was changed to a monthly volume; July, 1885, the monthly issue was split into two parts (volumes), and January, 1903, into three parts. From that time thirty-six volumes a year have been issued, and many of the volumes have been very large.

The Sundry civil act of Aug. 24, 1912, repealed the authority for the publication of the Specifications and drawings in any collected form. The series will therefore end with the volume (in three parts) for June, 1912. Owing to their great size perhaps, or to some other reason not made public, the bound volumes have always been in arrears and are so now. The latest volumes received at the Documents Office are the three for June, 1911, and no more are expected. Some volumes have been sent out in unbound signatures.

A hasty count, which there is not time to verify, seems to show that when the set has been got together on the shelves it will count up 974 books, mostly of mammoth size, filling about 350 feet of shelf-room.

The Specifications and drawings of patents are still printed in the pamphlet or slip form and sold by the Patent Office at 5 cents each. Only the bound volumes have been discontinued.

#### BIRD RESERVES AND NATIONAL MONUMENTS

It appears by the 1914 Annual report of the Commissioner of the General Land Office, issued during the present month, that there are now sixty-seven national bird reserves and thirty national monuments, three of the former and two of the latter having been created by Executive proclamation since the issue of the 1913 Annual report of the Land Commissioner.

The new bird reserves are: 1. Anaho Island, in Pyramid Lake, Nevada, the home of the white pelican; 2. Smith Island, in the Strait of Juan de Fuca, Washington State, the roost of wild ducks and geese and of many migratory shore birds, which have been slain in thousands by market hunters; 3. Black-beard Island, off the coast of Georgia, evidently named for one of the most eminent pirates of the 18th century, Edwin Teach by real name, described in the *Encyclopedia Britannica* as "a grotesque brute," who met his natural death—that of violence—at the hands of Lieut. Milrain in 1718.

The two new national monuments are the Cabrillo, about half an acre in extent, on Point Loma, Cal., where citizens of the locality will place a historic statue to the memory of Juan Rodriguez Cabrillo, who is said to have discovered California in 1542, and the Papago Saguaro, about eight miles north-easterly from the city of Phoenix, Ariz. This latter monument is described as a tract of 2,050 acres of nonirrigable desert, of no value for agriculture, and yet yielding a desert flora of giant cacti, yuccas, and palms so magnificent and of such exceptional scientific interest as to be thought worthy of preservation as a national monument.

#### A NOTABLE INDEX

Publication 185 of the series of publications of the Carnegie Institution of Washington, now in course of publication, is a work of great interest to those

librarians who have or expect to have important collections of United States public documents. It is: Index to United States documents relating to foreign affairs, 1828-1861. In three parts. Part 1-A to H. By Adelaide R. Hasse, Chief of Public Documents Division, New York Public Library.

The inclusive dates, 1828-1861, are fixed by the close of the period covered by Gales and Seaton's State papers, class foreign relations, 6 vols., 1789-1828, and the beginning of the State Department's annual series of Foreign relations, 1861. These two series, before 1828 and after 1861, are indexed after a fashion, but the intermediate period, 1828-1861, is now so much more thoroughly indexed that a demand is likely to arise for a reindexing of the earlier and later periods.

Part 1, which covers a third of the alphabet, fills 793 double-column quarto pages, in 8-point and 6-point type, indicating more than 2,000 such pages for the complete index.

### Topographic sheets

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are ordinarily used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch, covering, respectively, average areas of 230, 920, and 3,700 square miles. For some areas of particular importance special large-scale maps are published. The usual size, exclusive of the margin, is about 17.5 inches in height by 11.5 to 16 inches in width, the latter varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

Nearly two-fifths of the area of the country, excluding outlying possessions, has been mapped, every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 10c. each; but in lots of 50 or more copies, whether of the same sheet or of different sheets, the price is 6c. each. In no case can orders be filled at the wholesale rate unless the sum remitted solely for topographic maps amounts to at least \$3.00.

## TOPOGRAPHY DIVISION

NOTE.—Since February, 1908, the Topography Division has been preparing rural-delivery maps of counties in which rural delivery is completely established. They are published in two forms, one giving simply the rural free delivery routes, starting from a single given post office, sold at 5 cents each; the other, the rural free delivery routes in an entire county, sold at 20 cents each. A uniform scale of 1 inch to 1 mile is used. Editions are not issued, but sun-print copies are produced in response to special calls addressed to the Finance Division, Office of Third Assistant Postmaster General. These maps should not be confused with the post route maps for which see Monthly catalogue for January, 1914, page 367.

### SMITHSONIAN INSTITUTION

NOTE.—In its latest price-list the Smithsonian Institution publishes this notice: "Applicants for these publications are requested to state the grounds for their requests, as the Institution is able to supply papers only as an aid to the researches or studies in which applicants are especially interested. The papers included in this list are distributed *gratis*, except as otherwise indicated. Publications should be ordered by the publication number, and arranged in sequence. The serial publications of the Smithsonian Institution are as follows: 1, Smithsonian contributions to knowledge; 2, Smithsonian miscellaneous collections; 3, Smithsonian reports. No sets of these are for sale or distribution, as most of the volumes are out of print. The Contributions to knowledge and Miscellaneous collections are distributed without charge only to public libraries, learned societies, institutions, and specialists in this country and abroad. The Smithsonian reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remain to supply other demands. No general mailing-list of individuals is maintained. The reports can be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. Remittances for publications not distributed gratuitously should be made payable to the 'Smithsonian Institution.' Applications from libraries should be accompanied by a statement of the number of volumes which they contain and the date of their establishment, and should have the endorsement of a Member of Congress." The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution.
